

Zinc Die Casting Alloys—ZA-8 (ZnAl8Cu1、ZP0810)

ZA Alloys were originally a family of Zinc-based gravity casting alloys, but introduced as die casting alloys in the 1970's. ZA-8 is the most economical of the ZA alloys due to its ability to be cast in a hot chamber die casting machine.

Summary of Benefits:

- Can be die cast and gravity cast.
- Lighter than Zamak alloys.
- ZA-8 offers improved strength, hardness, fatigue and creep performance.
- Commonly used for strength as well as its ability to be plated at lower cost than aluminum die casting alloys.
- Hot Chamber alloy.
