K730

Powerful die-cast handrail holder Ø50.8mm

Flat cast plug for pipe Ø50.8 mm

ART.	Length mm	Holders qty	For steps qty
k730-10	1000	2	2,3
k730-13	1300	2	4
k730-17	1700	3	5
k730-23	2300	3	6,7
k730-33	3300	4	9,10
k730-37	3700	5	11
k730-43	4300	5	12,13

Reliable ready-made wall-mounted handrail, which is enough to install on the wall and the railing is ready! This model uses only high-quality cast parts, tested on thousands of objects, and a polished pipe with a mirror surface of 800 Grit. These wall-mounted handrails can be installed on the street, they will retain their original shine and will not rust. Especially for objects with medium and high traffic.

K731

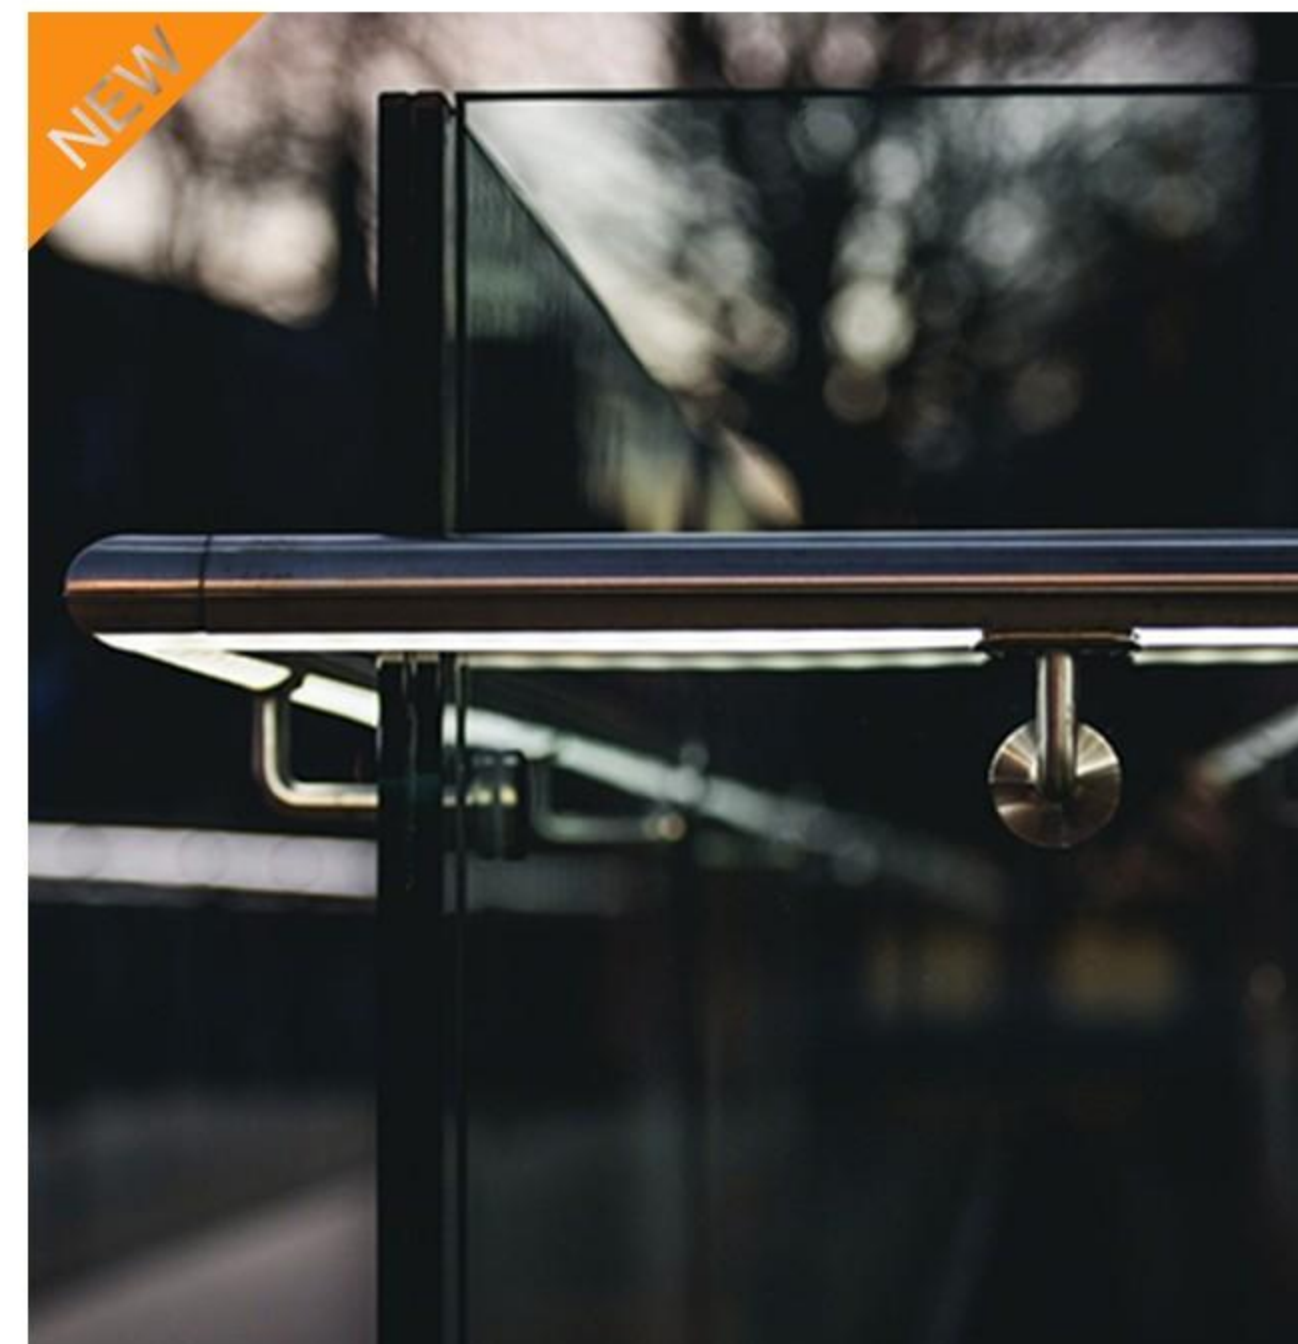

Hemispherical stamped plug for pipe Ø50.8mm

the wall holder of a hand-rail of Ø50.8mm "house-keeper"

ART.	Length mm	Holders qty	For steps qty
k731-10	1000	2	2,3
k731-13	1300	2	4
k731-17	1700	3	5
k731-23	2300	3	6,7
k731-33	3300	4	9,10
k731-37	3700	5	11
k731-43	4300	5	12,13

Option "Economy" wall grab bar. Also fully ready for wall mounting. Installation is possible only inside dry rooms with medium and low traffic.

The line be drawn the outline of different personality

LED Handrail

Our GP-lights Linear Light range offers high-quality LED solutions designed for flexibility, ease of installation, and aesthetic integration. The comprehensive product line includes everything from LED strips and connection cables to LED tubes and handrail brackets with built-in cable ducts.

Whether you're installing an LED handrail on a wall or glass panel using dedicated brackets, or opting for our illuminated cap rails for mounting directly on top of a glass railing — the system gives you the freedom to achieve the precise lighting effect you envision.

Incorporating LED lighting into posts or handrails doesn't have to be complex. While a qualified electrician is required to connect our transformers to the main power supply, the rest of the GP-lights Linear Light system is designed for straightforward installation by the user.

To support you, we provide a clear and detailed instruction manual, along with step-by-step assembly videos. These resources demonstrate just how easy it is to click LED strips into place, neatly conceal cables, and achieve a clean, professional finish.

Always find a match for your railing

The GP-lights Linear Light LED strips are available in convenient lengths of 32.8 ft and 98.4 ft, and come pre-wired on one end for quick and easy installation. For longer applications, strips can be seamlessly extended using our reliable connectors. Need a shorter length? The strips can be cut at multiple designated points, offering exceptional flexibility.

Engineered for efficiency, all LED strips in the range are highly energy-saving and maintain consistent light density across their entire length — ensuring uniform illumination for any railing configuration.

Smart Lighting, Tailored to Your Project

Integrate your LED handrail into any smart-home environment with GP-lights, compatible with a wide array of control systems — including wireless solutions. From programmable time slots to precise dimming control, you have full command over the lighting experience.

Need a unique feature or functionality not found in our standard range? Our team will work with you to develop a custom-built solution, ensuring optimal integration with your specific project requirements.

High-Grade, Safe LED Handrails for Demanding Environments

The GP-lights Linear Light system is designed for use in both indoor and outdoor railing and stair applications. Its robust construction and high-quality materials ensure long-lasting performance, even in high-traffic or exposed environments.

With an IK10 impact resistance rating, the system offers excellent protection against vandalism, making it a reliable and secure choice for public spaces where safety and durability are essential.
