ALES CEMENT

URBANIZATION

KITO's ALES Cement Render collection is a hallmark of understated beauty of rendered cement. With its distinctive look, rendered cement is a nod to contemporary, modernist, and brutalist architecture that plays a vital role in urbanization sprawl - Los Angeles in this case, a prime example of how urbanization transforms a city outlook forever.

Weathered grain etched onto hyper-realistic soft smudge surface encapsulates the true beauty of rendered cement in porcelain tiles format.
