Hand Pallet Truck with scale is an excellent economic solution for all weighing requirements in a busy warehouse environments, which allows you to weigh cargo where you want and when you want.

High accuracy

Maximum error 0.1% of scale capacity, even with floor conditions that are not optimal or when a load is placed out of centre, the accuracy remains high.

High definition display

The display can be read from any angle around the scale. When operator is standing near the pallet for dosing, or for adding products to the pallet by weight.

Saving time and high efficiency

Reduce the number of operators and save time for maximum efficiency. LCD display shows all the measurement results in clearly readable numbers.

Big function keys that "click"

When pushing the function keys, the operator senses a "click" movement. Even when working with gloves, the operator feels whether he has pressed the key properly.

High definition display

The scale offers gross /net weighing , total weight , piece counting and tare functions reading in 1 kg increments .

Optional:

Printer which is reliable in mobile applications . Use of printer does hardly influence the life time of the batteries . The printer is protected for use at low battery voltage levels .
